### Secretary for Health and Family Services Final PDL Selections from Pharmacy and Therapeutics Advisory Committee

#### August 5, 2004 Meeting

This chart provides a summary of final PDL selections that were made by the Secretary for Health and Family Services as a result of the Pharmacy and Therapeutics Advisory Committee meeting of August 5, 2004 resulting in recommendations and product supplemental rebate submissions.

|    | Description of Recommendation   | P & T Vote                 |
|----|---|----------------------------|
| #1 | Antiemetics, 5HT3  1. All products in the 5-HT <sub>3</sub> class are considered clinically equivalent in efficacy and safety.  2. Select all products as preferred based on economic evaluation.  3. Quantity limits - Place quantity limits on the 5-HT <sub>3</sub> antagonists and on Emend with the quantity limits based on the average quantity per treatment session (and "X" number of sessions per month), and on available package size of each product. Requests for higher doses would require PA. The following are suggested quantity limits based on four cancer treatment cycles per month adjusted for available package sizes.  Zofran: 4mg and 8mg: 9 tablets per month  24mg: 3 tablets per month  Liquid: 60ml/month  Injection: 3 vials 20ml (40mg); and 6 vials 2ml (4mg)  Kytril: 1mg tablets: 6 tablets per month  Liquid: 80ml/month  Injection: 6 vials 1mg/1ml  Anzemet: 50mg and 100mg tablets: 5 tablets per month  Injection: 3 vials 100mg/5ml; and 6 ampules 12.5mg/0.625ml  Emend: 3 Tri-packs (9 tablets) per month  4. PA required. Approval based on stated chemo agent and/or type of radiation. Quantities restricted to those mentioned in guidelines above and number of requested cancer treatments per month. Non-oncology use will be approved on an individual basis based on prior use of first-line antiemetics.  5. For any new chemical entity in the Antiemetic 5-HT <sub>3</sub> class, require a PA and quantity limit until reviewed by the P&T Advisory Committee. | Passed 9 - For 0 - Against |
| #2 | <ol> <li>Ophthalmic Antibiotics</li> <li>All of the ophthalmic products within each class are considered clinically equivalent in efficacy and safety to the other products in that class, ie;         <ul> <li>a. Combination Antibiotic Products,</li> <li>b. Miscellaneous Single Entity Antibiotic Products,</li> <li>c. Corticosteroid/Antibiotic Combination Products,</li> <li>d. Fluoroquinolones, 2<sup>nd</sup> and 3<sup>rd</sup> generation (Ofloxacin, Ciprofloxacin, Levofloxacin),</li> <li>e. Fluoroquinolones 4<sup>th</sup> generation (Gatifloxacin, Moxifloxacin) and</li> <li>f. Aminoglycosides.</li> </ul> </li> <li>Select at least one (1) product from each of the following classes as preferred based on economic evaluation: a). Combination Antibiotic Products b). Miscellaneous Single Entity Antibiotic Products c). Corticosteroid/Antibiotic Combination Products d). Aminoglycosides.</li> <li>Select Ocuflox as preferred for the 2<sup>nd</sup> and 3<sup>rd</sup> generation Fluoroquinolone class.</li> <li>Select Vigamox as preferred for the 4<sup>th</sup> generation Fluoroquinolone class.</li> <li>Consider no more than 3 fills for any ophthalmic corticosteroid/antibiotic combination product during a six month period.</li> <li>For any new chemical entity in the Ophthalmic Antibiotic class, require a PA and quantity limit until reviewed by the P&amp;T Advisory Committee.</li> </ol>   | Passed 9 – For 0 – Against |
